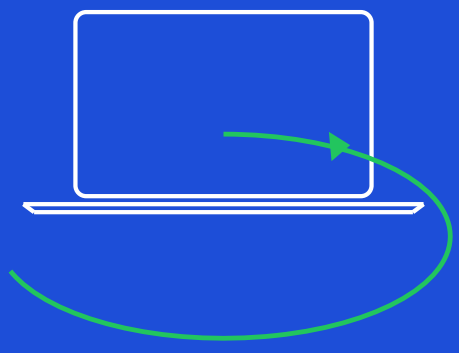
techware.

Website v1

What the first complete version of Techware will look and feel like



Version 1.0 | October 2026 | Nigeria

Wireframes are illustrations of layout and features. Final visuals will follow the Techware brand.

Website v1 at a glance

Version 1 is the first complete, launchable Techware marketplace: customers browse and buy in naira, vendors sell through the platform, and a super admin controls quality.

3	4	360°	NGN
User roles	Build stages (0 to 3)	3D view of every product	Naira prices and payments

What makes v1 special

- **Modern and trusted look**
  Clean blue, navy and green design, fast on mobile, written in plain English.
- **3D on every page**
  Hero animations, rotatable 3D products, and 3D touches inside every dashboard.
- **A real marketplace**
  Customers, approved vendors and a super admin with full control and statistics.
- **Safe buying**
  Google sign-in, approved products only, warranty information and secure naira payments.

Technology

Next.js Website and dashboards	**Three.js** 3D products and animation	**NestJS** Business logic and API
Supabase Database, login, files	**Paystack** Naira payments (proposed)	**Google OAuth** Sign-in

Build stages

Stage 0	Stage 1	Stage 2	Stage 3
Foundation	**Storefront**	**Dashboards**	**Checkout**
Setup, database, login, 3D base	Landing page, 3D products, cart	Customer, vendor, super admin	Payments, orders, launch

Pages and journeys

Everything a visitor, customer, vendor and super admin can do in v1.

Public

- Home (landing)
- Shop and categories
- Product details (3D)
- Search results
- Cart
- Sign in with Google
- About and support

Customer

- Dashboard
- Wishlist
- Buy later
- Orders and tracking
- Returns
- Checkout and payment
- Profile and addresses

Vendor

- Registration (4 steps)
- Approval status
- Dashboard and sales
- Product upload and edit
- 3D model upload
- Orders and returns
- Earnings summary

Super admin

- Statistics overview
- Customers and details
- Vendors and documents
- Product approvals
- Orders and returns
- Quality per vendor
- Settings and audit log

Buying journey

Open home page → **Browse products** → **Open product and rotate in 3D** → **Add to cart**

Sign in with Google → **Checkout** → **Pay in naira** → **Order confirmed and tracked**

Visitors can browse freely. Google sign-in is only required at checkout.

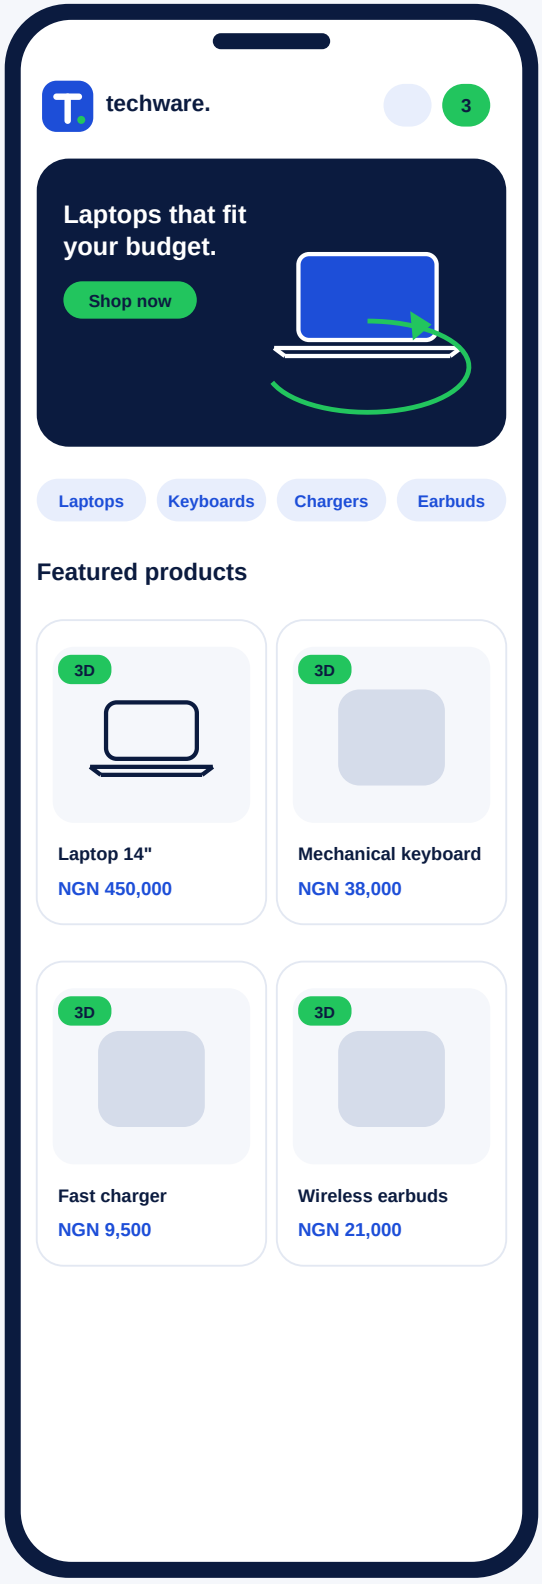
Selling journey

Vendor registers (4 steps) → **Admin reviews documents** → **Vendor approved** → **Vendor uploads product**

Product shows as pending → **Admin approves** → **Product goes live in 3D** → **Customers buy**

Landing page (Stage 1)

The front door of Techware: a cinematic 3D hero, then the catalog.



1 3D hero

A floating, slowly rotating laptop and accessories. The camera moves as the visitor scrolls.

2 Shop by category

Quick chips for laptops and each accessory type, plus brand shortcuts for Dell, Lenovo and HP.

3 3D product cards

Each card shows a product that can be previewed in 3D, with its naira price.

4 Trust and footer

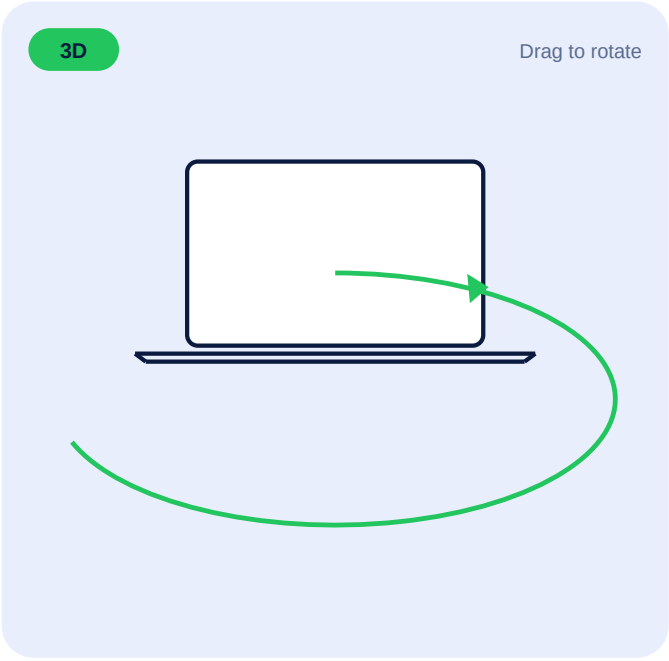
Genuine product promise, warranty, delivery information, WhatsApp support and clear policies.

5 Fast on mobile

3D loads gradually with an image placeholder, so the page opens quickly on any connection.

Product details page (Stage 1)

Every product has its own page. The customer can inspect it from every side in 3D before buying.



What the customer can do

1. **Full 360° rotation**
   Drag or swipe to see left, right, top, bottom and back, with smooth momentum.
2. **Zoom and fullscreen**
   Pinch or scroll to zoom into ports, keys and finish. Fullscreen for detail.
3. **Quick view buttons**
   Jump straight to front, back, left, right, top or bottom.
4. **Photos as backup**
   An image gallery shows if 3D is unavailable on the device.
5. **Clear buying info**
   Price in naira, condition, stock, warranty and seller shown upfront.
6. **One-tap actions**
   Add to cart, save to wishlist or keep for later, all from this page.

Dashboards (Stage 2)

Three role-based dashboards, each with 3D visuals and clear next actions.

Customer dashboard

- Overview
- Wishlist
- Cart
- Buy later
- Orders
- Returns
- Profile

12	3	5	8
Wishlist	Cart	Buy later	Orders

Product	Product	Product
NGN 0,000	NGN 0,000	NGN 0,000

Vendor dashboard

- Overview
- Products
- Orders
- Returns
- Earnings
- Company
- Documents

1. Personal | 2. Company | 3. Documents | 4. Submit

Products and approval status

14-inch Laptop	Approved
Wireless earbuds	Pending
Phone case	Rejected

+ Upload product and 3D model

Super admin dashboard

- Statistics
- Customers
- Vendors
- Approvals
- Orders
- Quality
- Settings

1,240	58	930	17
Customers	Vendors	Products	Pending

Sales

Approval queue

Laptop (Vendor A)	Review
Charger (Vendor B)	Review
Case (Vendor C)	Review

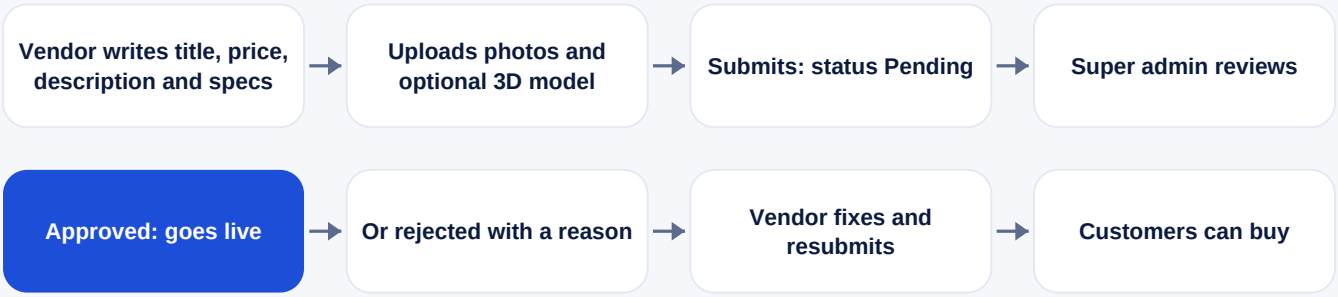
3D experience and approvals

How 3D works across the site, and how every product earns its place on the marketplace.

3D in every stage

Landing page	Floating 3D hero, scroll-driven camera, 3D product cards
Product page	Full 360° viewer with views, zoom and fullscreen
Cart	Small 3D preview of each item
Customer dashboard	3D thumbnails in wishlist and orders
Vendor dashboard	Upload and preview a 3D model before submitting
Super admin dashboard	Review products in 3D and animated stat visuals

Product approval flow



Only approved products from approved vendors appear on the marketplace. Editing key details of a live product sends it back for review.

3D performance promises

- Models are compressed and load gradually, with an image shown first.
- Smooth on mid-range phones; falls back to photos if 3D is not supported.
- Vendors without a 3D model still sell with photos and a placeholder tag.
- Respects reduced-motion settings for comfort.

v1 scope and next decisions

What is inside v1, what waits for later, and what we need to decide.

In v1	After v1 (ideas)
3D landing page and product pages	Mobile app
Catalog, search and filters	Discount codes and flash sales
Cart, wishlist, buy later	Installment or buy-now-pay-later
Google sign-in	Automatic vendor payouts
Customer, vendor and super admin dashboards	Live chat support
Vendor registration and approvals	Product comparison
Naira checkout, orders and returns	AR view on the customer's desk
Reviews and WhatsApp support	More cities and categories

Decisions needed from you

- [ ] Confirm the payment provider (Paystack is assumed).
- [ ] Confirm the fourth dashboard you mentioned, if there is one.
- [ ] Choose your first laptop models, brands and price ranges.
- [ ] Choose delivery cities and delivery fees for launch.
- [ ] Set the commission Techware takes from vendor sales.
- [ ] Pick a domain name, tagline and social media handles.
